**DETAILED ACTION**

***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1 and 2, drawn to a method for determining a material in vitro have an LAK enhancing effect comprising:

- a. Isolating lymphocyte
- b. Treating lymphocyte with a screening material, wherein the said material is an extract of  
Lentinus edodes mycelium
- c. Measuring LAK activity

Group II, claim 3, drawn to a screening material containing an extract of lentinus edodes mycelim being used for screening of enhancing of LAK activity.

Group III, claim 4, drawn to a method for treating a tumor of a subject by in vivo administering the screening material in Group II.

The instant claims are not linked by special technical feature because claims 1-4 is obvious over the prior arts. Yamamoto et al (Biosci Biotechnol Biochem, Vol 61, p 1909-12, 1999) teach the water-soluble rich fraction of Lentinus edodes mycelia (LEM) has antiviral and immunopotentiating activities. Yamamoto et al teach that fractions from culture medium of LEM activate the cytotoxicity of NK cells, macrophages, and activated T cells in vitro.

Art Unit: 1642

Liu et al (Immunopharmacology, vol 40, p187, 1998) teach that induction of immunomodulation cytokine by polysaccharide-peptide complex from culture mycelia of lentinus edodes (LE). Liu et al teach that production of IL-2 and TNF-alpha are augmented in the murine spleen mononuclear cells and murine peritoneal exudates macrophages treated with LE. Liu et al also teach that the production of IL-2 and TNF were augmented in the human peripheral blood mononuclear cells treated with LE.

The instant claims do not make a contribution over the prior art. Therefore, the instant claims lack a special technical feature, which distinguish them over the prior art. Based on this lack of a special technical feature, restriction for examination purposes is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
